Education

Master of Computer Applications (MCA) 2023–2025

Lok Jagruti Kendra University, Ahmedabad, CGPA: 8.08/10

BCA Computer Applications 2023–2025

Lok Jagruti Kendra University, Ahmedabad, CGPA : 7.50/10

Higher Secondary School 2017-2020

Nalanda Vidyalaya, Grade **12th-Std**: 60%, Grade **10th-Std**: 58%

Experience

Software Developer

Tridhya Tech Ltd.

February-2025 – September-2025

Canary Project (Enterprise Cost Estimation System — .NET Core + React, PostgreSQL)

- I worked on the project under my mentor's guidance, handling both development and support tasks. fixed Minor and major bugs to make the system more stable and reliable, made database changes in PostgreSQL such as updating tables, running migrations, and improving queries, and added new features to improve reporting, data handling, and overall workflows. I also learned how to use CI/CD pipelines for builds, deployments, and server setup.

OfficerApps (Security Guard Management System — .NET Core + Docker, SSMS, Angular)

- I worked on different tasks such as fixing bugs to keep the system running smoothly. I also learned how to use **Docker** to run applications with images and containers, which made deployments easier and more consistent.
-

Kunte Modha Shah Advisors LLP

July-2023 to April-2024

- The software is designed for a company's wealth management system (family office). It manages the investment and wealth data of the company and its individual members. This ensures efficient tracking and management of financial assets.

Skills

- **Programming & Frameworks:** Django Python, C#, Java, ReactJS, ASP.NET, Android Development, Wordpress
- **Databases:** MySQL, SQL Server Management Studio (SSMS), Firebase, PostgreSQL
- **Development Tools:** VS Code, Visual Studio, Android Studio, Eclipse
- **Other Skills:** Project Management, Team Leadership, Agile Development

Projects

AutoDeal — Django, Python, Razorpay, HTML, CSS, JavaScript

- Built a **vehicle marketplace platform** with advanced features for buying, selling, and comparing pre-owned vehicles.
- Integrated **Razorpay payment gateway** for booking payments.
- Implemented modules for **RSA service, vehicle service booking, dealership locator, blogs, and filters** (brand, pricing, variants).

Chronomiles — ReactJS, HTML, CSS

- Designed an **e-commerce platform for watches** with features like secure checkout, advanced filters, wishlists, and order history.

Luxedrive — ASP.NET, SSMS

- Developed a **luxury pre-owned vehicle platform** enabling vehicle sales, service scheduling, and seamless booking.

Ecommerce Clothing Store — Wordpress, XAMPP (MYSQL)

- Built an **e-commerce clothing store** using **WordPress** and **WooCommerce**, hosted on **XAMPP localhost**.
- Configured **MySQL database** to manage products, categories, users, and customer orders.
- Implemented **secure checkout process**, product categorization, size and color filters, and **payment gateway integration** for seamless transactions.

- Customized **WordPress themes and plugins** to enhance user interface, responsiveness, and overall customer experience.
